WHAT IS Brain Science?

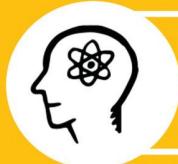

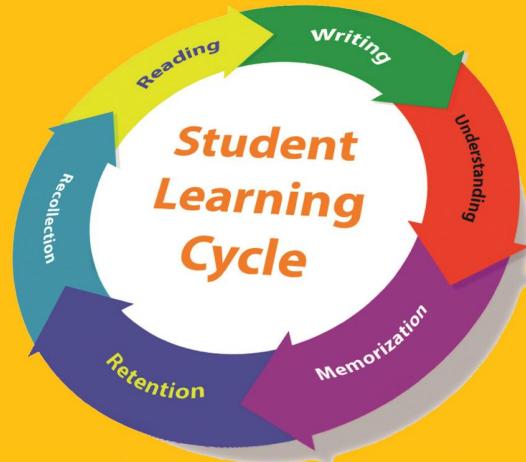

It is based on Education Psychology to give psychological solutions to students in order to enjoy the studies and exams. Students usually forget the content even after memorizing so many times. Brain science deals with removing the habit of forgetting by converting the study content into **Permanent Memory** with the help of imagination and Associative principles.

It is based on Mnemonic Science -

Recollection Science also known as **4th Dimension of Education**

Education Learning has four dimensions- 1) **Reading** 2. **Writing**

3. **Understanding** 4. **Recollection** (Nobody is helping students in recollection)

RECOLLECTION

(No Help to Students in this Dimension)

NO SUPPORT ?

What is India's Memory Test ?

IMT is a National Level Memory Competition that is getting conducted in various States/Districts of India. All the Students will compete to win the title of **India's Memory King**. This Test aims to promote **Stress-Free Education** and **Scientific methods of Learning** among children at an early stage to capture their learning interests and develop strong foundations. Exams are the time of **recollection of knowledge** gained during the academic year but unfortunately, many students don't know how to learn the right way to have better retention and **recollection of knowledge in the Examination**. IMT training will empower the student with new scientific techniques of learning that will improvise their academic scores and will help to test their **memory power**.

Purpose of IMT

To Promote Stress-Free Education and Empower students with Scientific Techniques of Learning.
